

METRO ETHERNET SOLUTION

Cost-effective, exceptionally reliable, secure and simple to maintain

Fast, Reliable Ethernet Service for Your Business

With committed speeds from 10 Mbps to 10 Gbps, DQE's Metro Ethernet solution extends your Ethernet LAN over our wide area network (WAN), connecting each of your users via a redundant, secure network.

- Reliability of the network is unmatched, with a low-latency, fiber-optic based core ring configuration
- <50 millisecond failover in the event of a fiber cut.
- Local, in-house NOC (Network Operations Center) technicians available 24/7/365.

Guaranteed Scalability

- Our custom solutions are always flexible and can easily scale with all of your business' increasing bandwidth demands.

Highlights of DQE's Metro Ethernet Solution

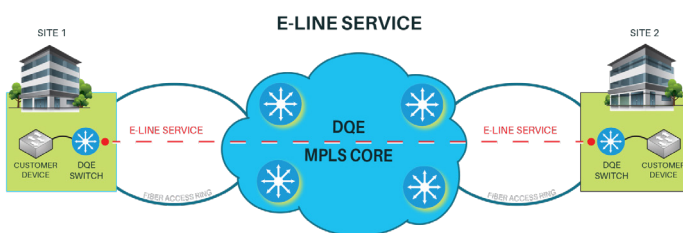

- 100% fiber optic network architecture
- Redundant core ring configuration
- Cost-effective, robust and easy to maintain
- 24/7/365 network monitoring

Superior Security

- A true, Private Network, which inherently creates a much more secure solution than an internet-based Virtual Private Network.
- Additionally, DQE's all-optical path provides far greater physical network security than electrically-based transport.

Customized E-LINE Solution:

High-speed LAN-to-LAN connectivity between two enterprise locations

Customized E-LAN Solution:

Connects multiple enterprise locations together in a private any-to-any LAN that extends throughout, and beyond, the metro area
