ABOUT DQE COMMUNICATIONS

A partner for your business, offering network solutions and support that's unequaled by any other provider.

DQE Communications, headquartered in Pittsburgh, is a fiber optic Internet and networking access provider for businesses and carriers. Established in 1997, DQE is a subsidiary of Pittsburgh-based Duquesne Light Holdings, and presently operates in Pennsylvania, Ohio, and West Virginia. DQE understands your network is a critical operational element. That's why we strive to provide your business with the fastest data speeds and the most reliable service backed by a dependable, local support team.

Internet

Five tiers of Internet service—Lite, Basic, Dedicated, Internet Advantage, and Highly Available. All feature 100% symmetrical upload/download speeds.

Dark Fiber

Light up DQE's fiber with your privately owned network components where you'll be able to maintain direct operational control of your network at a fixed cost.

Colocation

Secure data storage facilities in Pittsburgh and Butler that are environmentally controlled, access DQE's fiber network, and use 24x7 multi-tier card access systems.

Cloud Solution

Private and direct connectivity to top-tier Cloud Service Providers such as Amazon Web Services and Microsoft Azure / Office 365.

DDoS Mitigation

Security solution for organizations looking to protect their network from disruptive and compromising Distributed Denial of Service (DDoS) attacks.

Add to DQE Internet services.

Metro Ethernet

With committed speeds from 10 Mbps to 100 Gbps, customers can extend their Ethernet LAN over DQE's MPLS network, connecting each user via a redundant, secure 100% fiber-optic network.

SD-WAN

Software-Defined Wide Area Network is a managed service that can be integrated into existing network infrastructure as an overlay, connecting your business across multiple sites.

Wavelength

Utilizes optical switching to transmit multiple signals through one pair of DQE fibers, supporting bandwidth-intensive business applications.

Guest Wi-Fi

Provides Internet access for your guests and customers separate from your business' primary network, adding a layer of privacy to your network.

Wireless Backup

Keeps your business moving in the event of a service disruption, providing a seamless transition to customer-controlled priority applications.

Add to DQE's Internet services or SD-WAN.
